Our Mission

To upgrade the Internet access in every public school classroom in America so all students can take advantage of the promise of digital learning.

What We Do

Our approach to solving the problem

EducationSuperHighway has built the organization around a three phase approach.

1. **Phase 1 (Completed 2012 - 2013):** Build awareness to make school connectivity a national priority by inspiring leaders at the federal and state level to effect change.
   - Helped catalyze President Obama’s ConnectED initiative to connect 99% of students to high-speed broadband by the year 2018
   - Secured support from prominent business leaders and CEOs
   - Worked with 30 states to assess their school broadband availability and affordability using EducationSuperHighway’s national SchoolSpeedTest

2. **Phase 2 (Completed 2013 - 2014):** Secure the necessary resources to ensure all schools have what they need to upgrade their broadband.
   - Partnered with the FCC to modernize the E-rate program
   - Established national connectivity targets
   - Grew broadband funding for K-12 connectivity and Wi-Fi by $2.5 billion per year

3. **Phase 3 - In Progress (2015 - ongoing):** Accelerate school network upgrades by working with state and school district leaders to get fiber to the schools that need it, ensure all classrooms have robust Wi-Fi, and to make broadband more affordable.
   - Launched *Compare & Connect K-12*, a broadband price transparency tool that helps school districts get more affordable bandwidth
   - Partnered with 22 governors, representing 21 million students, to ensure equal access to digital learning opportunities
   - Published three annual State of the States reports, which provide a state-by-state review of broadband challenges and opportunities for K-12 public schools across the country
