

Fast, Reliable Internet for Your Residents

The national non-profit, EducationSuperHighway, is **partnering with local leaders to bring free high-speed Internet to all households in eligible multifamily buildings**. These networks come at a low cost to both owners and residents.

OWNER BENEFITS

- No upfront costs, low recurring costs
- Increased resident satisfaction and referrals
- Greater retention rates, lower turnover
- Stronger property marketability
- Access for property management and smart building technology

RESIDENT BENEFITS

- Free or low-cost high-speed Internet service
- No contracts or credit checks.
- Easy to connect
- Unlimited data use for all residents
- Wi-Fi access in all apartments & common areas

How we help

- **Advice** on easy and affordable networks
- **Support** with awareness campaigns for resident adoption and ease of use
- **Secure** managed service provider (MSP) solutions.

How Managed Wi-Fi works in apartment buildings

Rather than each household buying their own internet connection, the owner procures a single internet connection for a property-wide Wi-Fi network and all residents are able to connect. This option will provide the building with better connectivity at a lower cost than traditional commercial Internet Service Provider options.

Help close the digital divide by connecting families, students, and seniors in your building to reliable internet.
