# WHAT IS APARTMENT WI-FI?

## WHAT IS APARTMENT WI-FI?

# Wi-Fi in low-income apartment buildings can connect 4 million households

**23%**

of the affordability gap is concentrated in apartment buildings in low-income areas

**9M**

People Unconnected

**4.1M**

Households Unconnected

We can leverage cost-effective Wi-Fi to make broadband as ubiquitous in apartment buildings as it is in airports, hotels, or coffee shops.

## HOW IT WORKS

# What is Apartment Wi-Fi?

1

It's known as "**Managed Wi-Fi**" in the industry.

Installed and maintained by a service provider - meaning the property owner is hands-off.

2

Residents can **easily connect** and have **great service**.

3

A **fast business internet connection** is used to connect the building.

4

It is a **cost-effective** way of connecting residents.

5

It's a common and **highly desired amenity** in new apartment buildings.

## WHAT IS APARTMENT WI-FI?

# Better Connectivity at a Lower Cost

### STEP 1

Procure a high speed fiber internet connection to the building

### STEP 2

Install Wi-Fi access points efficiently to provide ubiquitous coverage

### STEP 3

Provide residents with the SSID and password to connect to the internet

## APARTMENT WI-FI

# A sustainable alternative to traditional internet

|                                | TRADITIONAL INTERNET   | APARTMENT WI-FI   |
|--------------------------------|--|---|
|                                | Designed for Single Family Homes   | Designed for Apartment Buildings  |
| <b>Service Availability</b>    | In-unit only with no coverage guarantee  | Property-wide coverage, including common areas  |
| <b>Resident Responsibility</b> | Complicated sign-up process, lease/purchase equipment, managing data caps, overage fees, late fees, etc.         | Simply connect to the network. No credit checks, no contracts, no deposits, no additional equipment needed, no data caps.           |
| <b>Technical Support</b>       | Resident responsible for self-support and troubleshooting. General 1-800 number available.                       | Dedicated support for all residents. Monitored 24x7x365 with one number to call.  |
| <b>Ownership</b>               | ISP owns equipment and sometimes inside wiring, limiting property owner and resident choice to 1 or 2 providers. | Property owner will typically own infrastructure and equipment, which allows provider choice at the end of a contract.              |
| <b>Service-Level Agreement</b> | None. ISP only offers best effort service levels to individual households.                                       | Managed service provider (MSP) typically offers 99%+ uptime reliability with agreed upon response times for minor and major outages |

## APARTMENT WI-FI

More than 30 states are using BEAD, ARPA to deploy apartment Wi-Fi

# APARTMENT WI-FI & BULK BILLING

## MDU LANDSCAPE: PRODUCTS

# Bulk

Building Owner is Customer who pays for 100% of units

versus retail-only: **BETTER**

## Adoption Barriers Reduced

**ENROLLMENT**  
Automatic Sign-Up

**DIGITAL LITERACY**  
No self-installation

**AFFORDABILITY**  
Per Unit Cost Savings  
from Economies of Scale

### Ideas For Leveraging BEAD:

- Building Owner only charged for residents that subscribe or for only the backhaul
- Buy Down Monthly Rate by Subsidizing Capital
- Provide Free Service

# Managed Wi-Fi

Property-wide  
Enterprise Network

versus retail-only: **BEST**

## Adoption Barriers Reduced

**ENROLLMENT**  
Ease of Sign-Up

**DIGITAL LITERACY**  
Enterprise Quality  
No self-installation

**AFFORDABILITY**  
Per Unit Cost Savings due to  
Economies of Scale and  
Reduced Support Costs

**SUPPORT**  
Dedicated Support  
Optimized Wi-Fi Design

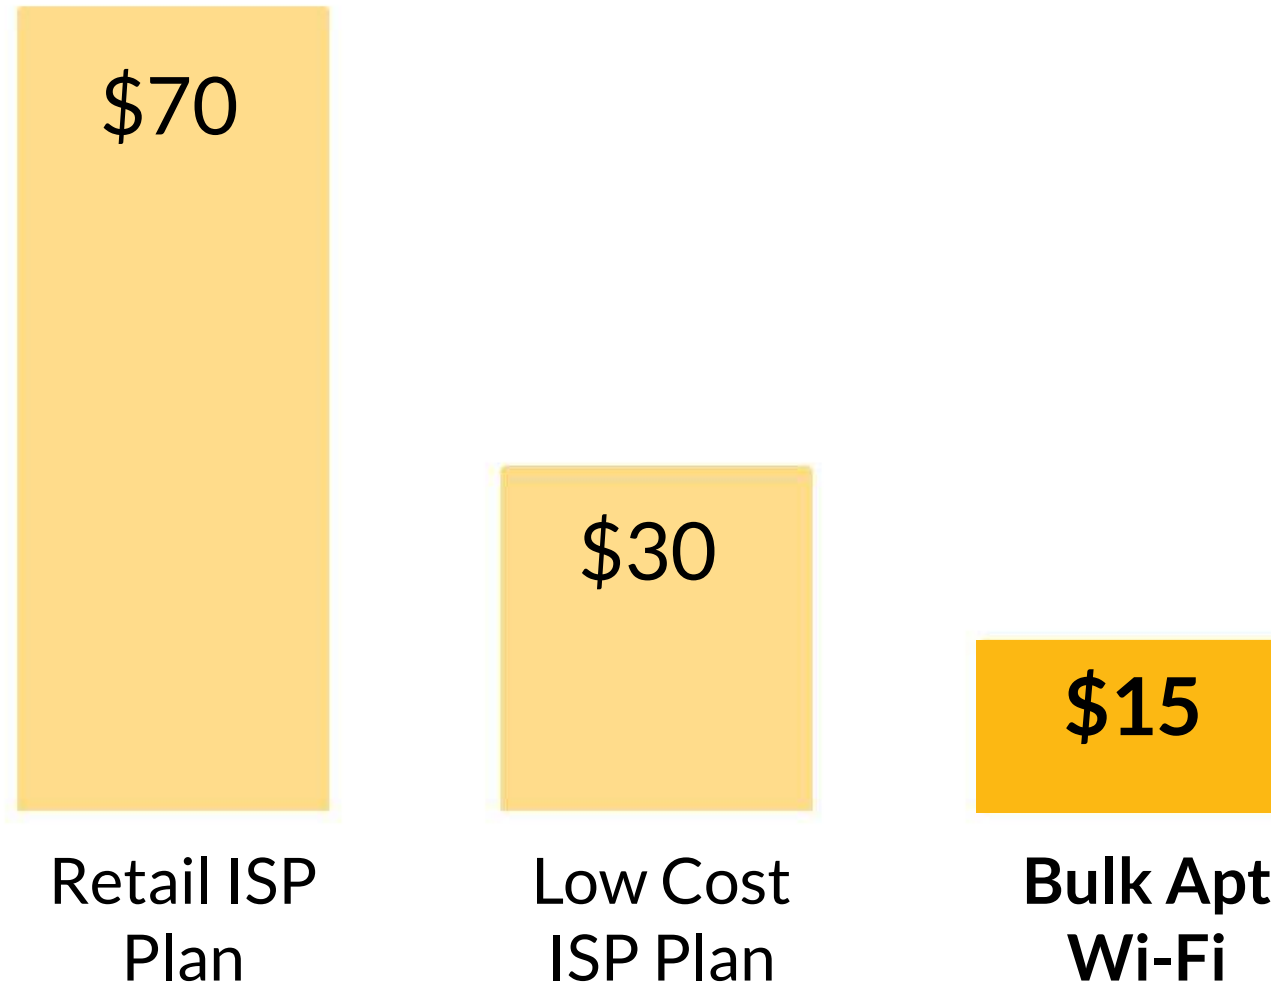

### Ideas For Leveraging BEAD:

- Provider Charges Resident Directly = Property Owner Doesn't Pay
- Buy Down Rate by Subsidizing Capital
- Provide Free Service

## HOW IT WORKS

Apartment Wi-Fi's cost per unit is significantly more affordable than alternative solutions
